DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Saylor et al. (6,707,889).

As to claim 1, Saylor teaches a method (Fig.4) for retrieving audio file in e-mail and web document, comprising the steps of:

Establish connection with a caller (202);

Processing a command for retrieving data where the data includes e-mail based data and web based data "The voice content that a user may create may comprise structured voice pages including audio, dialogs, menus, and links and may be stored in a variety of formats as well. The voice content may be stored as a XML-based voice file (e.g. TML or Voice XML), that references sound and text files" (204'; Fig.3, 72, 74, 60);

Identifying a voice page from the command (206);

Retrieving and executing the voice page by processing/interpreting the XML code through a voice browser (210; Fig.3, 66); and

Playing the audio to the user via the caller's phone (Col.5, lines 20-23).

As to claim 6, Saylor teaches receiving signals including DTMF signal and voice signal and converting them into textual Voice codes for accessing voice pages over a network (Col.5-49; Fig.19)

As to claims 2-5 and 7-8 Saylor teaches where communication is established between a user and the Vpage provider (Fig.4, 202) and where the system is accessible over the Internet (World Wide Web) or over a telephone network, and where the document providers include e-mail servers (Fig.8; Fig.3, 74).

Claims 9-13 and 15-18 are analogous to claims 1-8 and are rejected for the foregoing reasons by Saylor.

As to claim 14 for Saylor teaches authenticating the caller (Fig.16, 1608).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eteminan (6,426,956).
